

We provide a wide range of generator maintenance plans and solutions to suit every customer requirement. Our directly employed and experienced Service Engineers are fully trained and equipped to undertake all tasks, from planned preventative maintenance to emergency breakdown response repairs to ensure that your investment is kept in prime condition and ready to power up when it is needed.

Our Generator maintenance and support solutions include:

- Pre-planned maintenance
- Response repairs
- Lube oil sampling
- Diesel fuel sampling, testing and fuel polishing
- Diesel fuel tank cleaning
- Generator hire
- Load bank performance testing
- Remote monitoring

We only use Genuine Parts.

Genuine parts have been used to build your generator, these parts are selected by the manufacturer and rigorously tested to meet high quality, safety and performance standards. This ensures your generator will operate the way it was intended.

Our directly employed and experienced Service Engineers are fully trained and equipped to undertake all tasks, from planned preventative maintenance to emergency breakdown response repairs to ensure that your investment is kept in prime condition and ready to power up when it is needed.

We also have fully equipped modern workshop facilities to undertake a complete overhaul of your generator returning it to a like-new condition.

We provide a UK wide 24 hour emergency call out service, 7 days a week, 365 days a year to restore essential power supplies or carry out repairs without delay, providing peace of mind in times of emergency. We guarantee a minimum response time of 4 hours.

With Service Engineers home-based and fully equipped with service vehicles, tooling and parts on-board we never too far away from your building or facilities to quickly have you back up and running minimising downtime.
